

Table 1: Dataset-Specific Training Settings

| Expert/dataset                       | Batch size | Learning rate | Max sequence length | Warmup ratio | Special setting                                                                         |
|--------------------------------------|------------|---------------|---------------------|--------------|-----------------------------------------------------------------------------------------|
| Hate Expert / DynaHate               | 3          | 2.0e-5        | 1024                | 0.10         | Smaller per-device batch size than the other binary experts.                            |
| Offense Expert / TweetEval Offensive | 4          | 2.0e-5        | 1024                | 0.05         | Standard binary setup.                                                                  |
| Bully Expert / Kaggle Cyberbullying  | 1          | 5.0e-5        | 2048                | 0.05         | Longest sequence length; structured output format for bully vs. not_bully with subtype. |
| Threat Expert / Jigsaw Threat        | 4          | 2.0e-5        | 1024                | 0.05         | Current YAML sets <code>eval_dataset</code> to <code>jigsaw_threat_train</code> .       |
